**KOBELCO Construction Machinery USA Appoints  
Douglas Lake Equipment as Dealer in British Columbia**

Houston, TX – KOBELCO Construction Machinery USA continues its forward momentum in the relaunch of its excavator line by expanding their dealership representation to include Douglas Lake Equipment. Douglas Lake Equipment will represent KOBELCO’s full line of excavators in British Columbia.

“We are extremely excited to represent KOBELCO’s new line of excavators and work with the well-respected product and sales support teams in Houston,” states Garry Frelick, President of Douglas Lake Equipment. “We are confident this partnership will help us continue to expand our customer base and reach our market share growth objectives.”

KOBELCO has long been known for its world class line of excavators in the 3,000 lb. to 180,000 lb. classes. By focusing on a single line of equipment and dedicating its research and development dollars to improving and enhancing this singular line, the company has become known as excavator perfectionists, ensuring they deliver excavators that can withstand the day-to-day rigors of demanding jobsites, while providing operators with all the production and comfort features required for a profitable days work.

The staff of Douglas Lake Equipment will be working closely with KOBELCO to gain the required sales and product support training to deliver on KOBELCO’s promise of customer satisfaction. Douglas Lake Equipment will provide professional sales, service and parts support on all KOBELCO excavators from their Surrey, Kamloops and Quesnel, BC locations.

KOBELCO Construction Machinery USA is dedicated to producing a full range of crawler excavators for the rental, landscape, construction, aggregate, roadbuilding, forestry, material handling, site preparation, recycling and ancillary markets, including zero tail swing, standard, long-reach and compact models. KOBELCO machines are well-known for their advanced technologies including an innovative noise and dust reduction system, advanced hydraulic circuitry for reduction of pressure loss and superior fuel efficiency.
