**KOBELCO Construction Machinery USA Appoints
Great Lakes New Holland as Dealer in Ontario**

Houston, TX – KOBELCO Construction Machinery USA continues its forward momentum in the relaunch of its excavator line by expanding their dealership representation to include Great Lakes New Holland. Great Lakes New Holland will represent KOBELCO’s full line of excavators in west central and southwestern Ontario.

“KOBELCO has continuously set the benchmark for performance, fuel economy and reliability,” states Wayne Feltz, President of Great Lakes New Holland. “Our customers recognize through their experiences with KOBELCO that they offer a premium product. We’re proud to represent this distinguished line and look forward to continued growth with the seasoned KOBELCO team.”

KOBELCO has long been recognized for its world class line of excavators in the 3,000 lb. to 180,000 lb. classes. By focusing on a single line of equipment and dedicating its research and development dollars to improving and enhancing this singular line, the company has become known as excavator perfectionists, ensuring they deliver excavators that can withstand the day-to-day rigors of demanding jobsites, while providing operators with all the production and comfort features required for a profitable days work.

The staff of Great Lakes New Holland will be working closely with KOBELCO to continue to gain the required sales and product support training to deliver on KOBELCO’s promise of customer

satisfaction. Great Lakes New Holland will provide professional sales and service support on all KOBELCO excavators from their Mitchell and St. Thomas locations.

KOBELCO Construction Machinery USA is dedicated to producing a full range of crawler excavators for the rental, landscape, construction, aggregate, roadbuilding, material handling, site preparation, recycling and ancillary markets, including zero tail swing, standard, long-reach and compact models. KOBELCO machines are well-known for their advanced technologies including an innovative noise and dust reduction system, advanced hydraulic circuitry for reduction of pressure loss and superior fuel efficiency.
